

# Digital Marketing & Business Automation

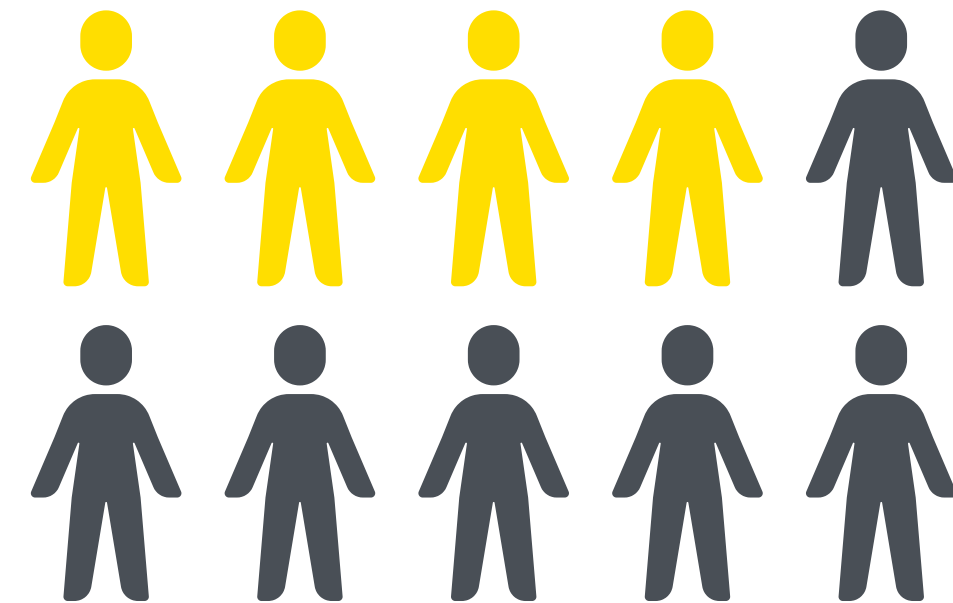

Grow your business, increase sales, and eliminate manual data entry. Learn how we can automate your business.

# Did You Know?

90% of data extraction and data entry still occurs manually?

Day-to day, manual data entry errors, such as typos or incorrect descriptions can have large and often very expensive consequences.

More than 40% of workers have reported that at least 25% of their time is wasted every day on redundant tasks.

**WE  
CAN  
HELP**

# We Help You Automate Your Business

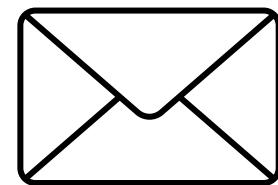

## What can we automate?

To keep it simple, just about anything can be automated.

### **Ordering**

We create apps and forms to help capture orders so your employees don't have to manually enter them

### **Email & Marketing**

Send automatic system generated emails to your clients so they have the latest information about their orders.

### **Document Generation**

Pull data from multiple sources and skip the manual data entry. Paper contracts and proposals are a thing of the past.

# Mobile App Development

## Control your business in the palm of your hand

While many business owners may think developing and having an app is too expensive or an unnecessary investment, a mobile app can actually help a small business engage with and build their customer base, drive sales, and improve their reputation in the market.

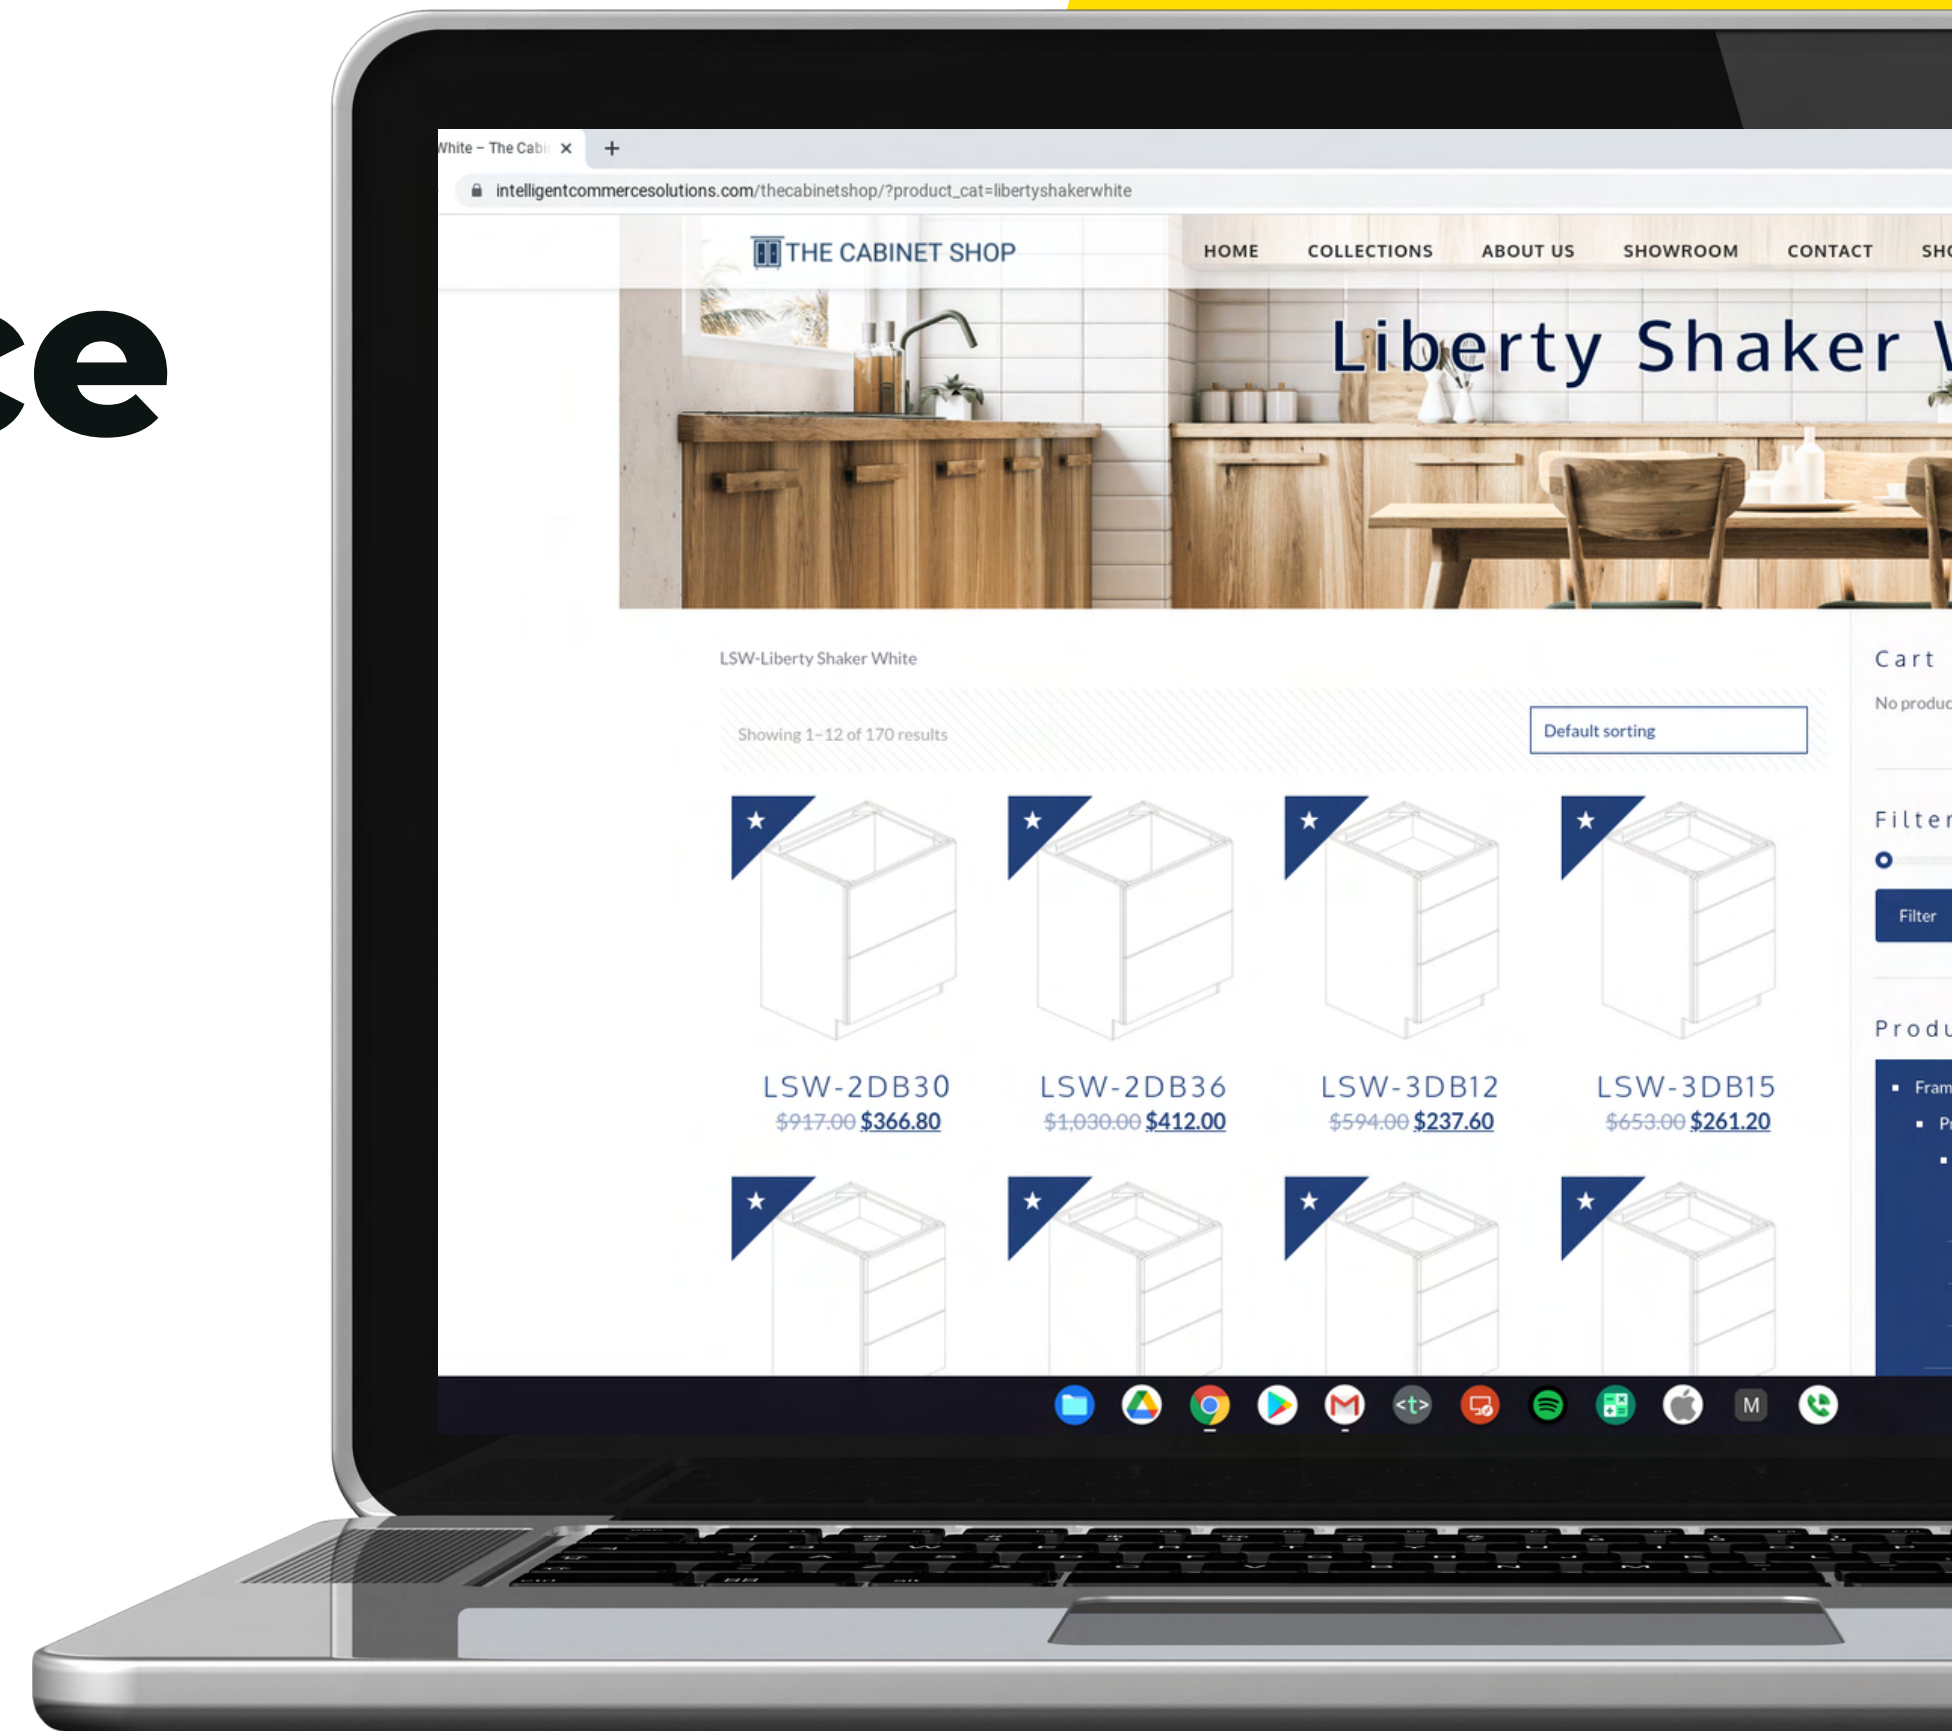

# Web Design & E-Commerce

Everyone is shopping online these days, so doesn't it make sense to have an online shop?

We've helped numerous clients get their business online. From front end design to backend development, our team can handle it all.

**Start making money while you sleep, let us help you set up an online store today!**
